

# W I R E L E S S DATA VAULT SERVICES

## Cloud Managed Wi-Fi: Simplified.

Demand for Wi-Fi services continues to skyrocket. That means your WLANs are under increasing pressure from more users, more types of connected devices, and more bandwidth-intensive applications. Your WLAN infrastructure needs to keep pace with all of these changes. But as you expand your Wi-Fi network, the strain on IT staff also grows.

Integracon's Wireless Data Vault Service takes the complexity out of deploying and managing a distributed Wi-Fi network. Respond faster to organizational needs while also reducing IT overhead. It eliminates the need for on-premises controllers, moving Wi-Fi management to the cloud. Your multi-site Wi-Fi network can be managed through a single pane of glass UI and full-featured mobile app.

## Integracon Cloud Managed Wi-Fi Includes:

- AP management
- Instant availability of new features
- Automatic security updates
- Native full-featured mobile app
- Reporting and analytics
- 24x7 phone/chat/web technical support
- Option of a 1-, 3- or 5-year subscription
